MAY 2021 - PRESENT

Tyler Technologies, Plano, TX – *Software Developer Intern*

- Migrated multiple states' informational e-File websites to a Content Management System (WordPress) to enable content to be updated by users on-site instead of needing to edit the code in a code editor. I was tasked with researching the different CMS options, presenting my findings to shareholders to evaluate, and then presented the finished product once online.
- Write load tests / Automation scripts for multiple applications that are then used to test the site's reliability and performance.

JAN 2021 - PRESENT

PenguinParty.eth , Remote */ Open Source – Web3 Blockchain Web Developer*

- Deploy staking contracts to initiate liquidity mining period
- Update front-end functionality and user experience in React App based on user stories and team input.
